

DOES YOUR SKIN GET RED AND ITCHY WHEN YOU SCRATCH OR RUB?

Dermographism is a temporary reaction of the skin that occurs when the skin is scratched or rubbed with a blunt object. Some people suffer from recurrent dermographism (symptomatic dermographism) that itches! We would like to find out how many people in Germany suffer from symptomatic dermographism!

Filling out this survey only takes a few minutes.

Please click on the link or scan the QR code with your smartphone.

We look forward to your participation.

Thank you very much!
